Problem Release Development requires 3 Sun Ultras to support evolutionary design using the Rational suite of tools. These machines are to be purchased. However, in the interim to allow Release Development to meet its schedules, 2 SUN Ultras from GSFC are requested to be put into the EDF and upgraded as follows: 4 GB internal disk (2 GB swap, 2 GB OS & Rational tools), minimum 6 GB external disk for design and documentation data. This upgraded disk space with the existing memory or these machines will provide capability for an additional 15-20 users per machine.							
Proposed Solution The following machines have been identified to support Release Development until 3 new machines can be provided: DDSHW-ORNL-2 and DDSHW-LARC-2.1. These machines will require minimum disk upgrades of 6 GB external disk to support the design and documentation data.
